SUMMARY

Full Stack Developer experienced with **Ruby on Rails** and **React**, with a strong foundation in **JavaScript**, **TypeScript**, **Node.js**, and **Next.js**. Experienced in building **APIs**, automation, integrations, and database-driven applications using AI-assisted development with **Claude Code**, with **9 merged pull requests** to open-source projects.

SKILLS

Languages: JavaScript, TypeScript, Ruby, SQL, Go
Frontend: React.js, Next.js, Tailwind CSS
Backend: Node.js, Express.js, Ruby on Rails, REST APIs
Databases: PostgreSQL, MongoDB, Prisma ORM
AI & Tools: Claude Code, Git, Firebase

WORK EXPERIENCE

Envision Next LLP — Associate Full Stack Developer **Apr 2026 - Present**

- Develop and maintain an enterprise CRM platform used by 200+ employees, working across HRMS, Incentives, Compliance Records, Automation, Scraping, Extensions, and Corrections modules.
- Owned end-to-end development of the Incentive module, building dashboards, employee and manager views, calculation logic, **Rails APIs**, database changes, filters, reports/exports, and approval workflows.
- Developed **MahaRERA API** integrations and automation for 1,000+ projects, implementing authentication, response processing, error handling, and Excel-driven workflows to automatically update project information.
- Built and enhanced production features across frontend UI, APIs, databases, authentication, permissions, integrations, and exports, investigating existing code and data flows to deliver end-to-end fixes and improvements.
- Used **Claude Code** as an AI-assisted development tool for codebase exploration, implementation, debugging, refactoring, and iterative development while reviewing and validating generated changes.

Tejas — Development Intern **May 2025 - Oct 2025**

- Engineered a custom **WebRTC** signaling mechanism using **Firestore**, establishing peer-to-peer video connections in under 2 seconds for 1-on-1 remote mentoring sessions.
- Implemented zero-polling real-time data synchronization with **Firestore onSnapshot** listeners, processing student questions and updating tutor dashboards with sub-500ms latency.
- Integrated **Framer Motion** for fluid UI transitions and optimized frontend asset delivery for improved application performance.

PROJECTS

Drivly P2P Vehicle-Sharing Platform Live Link

- Built a peer-to-peer vehicle-sharing platform for residential communities using **Next.js**, **TypeScript**, and **Tailwind CSS**.
- Integrated **Prisma ORM** with **PostgreSQL** and implemented custom **JWT** authentication, database schemas, and realistic multi-user seed data.

- Implemented **Next.js** streaming, loading states, and optimized UI patterns to improve perceived performance and user experience.

Blood Donor App - MERN Stack Live Link

- Developed a full-stack blood donor management application using **MongoDB**, **Express.js**, **React.js** and **Node.js**.
- Built **RESTful APIs** for user authentication, donor management, and data retrieval, with the frontend deployed on **Vercel** and secure cross-origin communication configured with the backend.

OPEN SOURCE CONTRIBUTIONS

Fleet — Contributor (7 merged PRs)

- Contributed fixes across policy execution, software inventory, script handling, navigation, and batch operations in a large-scale **Go** and **TypeScript/React** codebase.
- Made **fleetctl apply** reject incorrectly typed profile paths and labels, and stopped batch software uploads after the first package failure using a cancellable errgroup context.
- Collaborated with maintainers through pull requests, code reviews, CI validation, and iterative changes.

Superserve AI — Contributor (2 merged PRs)

- Contributed to **MCP** functionality, including network-log pagination with cursor forwarding and regression tests, and a development watcher fix.

Vitest — Contributor

- Opened a pull request adding **Temporal.Instant** and **Temporal.ZonedDateTime** support to **vi.setSystemTime()**, currently in review.

EDUCATION

B.E. in Information Technology, JSPM RSCOE - CGPA: 8.3 2020 - 2024
