SUMMARY

Full Stack Developer at Envision Next LLP, building CRM features with Ruby on Rails, React, and PostgreSQL. Experience with API integrations, approval workflows, and database-backed applications, with merged contributions to Fleet and Superserve.

SKILLS

Languages: JavaScript, TypeScript, Ruby, SQL
Frontend: React, Next.js, Tailwind CSS **Backend:** Ruby on Rails, Node.js, Express, REST APIs
Data and tools: PostgreSQL, MongoDB, Prisma, Firebase, Git, Claude Code

EXPERIENCE

Envision Next LLP | Associate Full Stack Developer Apr 2026 - Present

- Develop and maintain an enterprise CRM used by 200+ employees, including incentives, HRMS, compliance, and automation features.
- Owned end-to-end development of the Incentive module: Rails APIs, database changes, calculation logic, employee and manager dashboards, approval workflows, filters, and exports.
- Built MahaRERA API integrations and Excel-driven automation for 1,000+ projects, implementing authentication, response processing, error handling, and project-information updates.

Tejas | Internship May 2025 - Oct 2025

- Built WebRTC signaling with Firestore for one-to-one video mentoring sessions, establishing peer-to-peer connections between students and tutors.
- Implemented real-time question and tutor-dashboard updates using Firestore onSnapshot listeners, and added UI transitions with Framer Motion.

SELECTED OPEN-SOURCE CONTRIBUTIONS

- **Fleet - merged:** Fixed script-package identification and search behavior in software lists (PR #53810) and corrected script timeout messages (PR #54296).
- **Superserve - merged:** Added MCP network-log pagination with cursor forwarding and regression tests (PR #356); fixed development-watcher output deletion (PR #330).

PROJECTS

Drivly | Vehicle-sharing platform Live demo | Source

- Built a peer-to-peer vehicle-sharing application with Next.js, TypeScript, Tailwind CSS, Prisma, and PostgreSQL, including JWT authentication and multi-user booking workflows.
- Implemented booking-conflict checks in a database transaction with vehicle-row locking, and calculated booking prices on the server from stored vehicle rates.

Blood Donor App | MERN Live demo

- Built donor-management and authentication REST APIs with Node.js, Express, and MongoDB; connected a React frontend deployed on Vercel.

EDUCATION

JSPM RSCOE | Information Technology 2020 - 2024

CGPA: 8.3
