SUMMARY

Full Stack Developer at Envision Next LLP building an enterprise CRM with Ruby on Rails, React, and PostgreSQL. Experienced in REST API development, third-party API integrations, approval workflows, and database-backed web applications. Open-source contributor with 9 merged pull requests to Fleet (Go, TypeScript, React) and Superserve (TypeScript, MCP).

SKILLS

Languages: JavaScript, TypeScript, Ruby, SQL, Go, HTML, CSS
Frontend: React, Next.js, Tailwind CSS, Framer Motion
Backend: Ruby on Rails, Node.js, Express.js, REST APIs, JWT Authentication, WebRTC
Databases: PostgreSQL, MongoDB, Prisma ORM, Firebase Firestore
Tools: Git, GitHub, Vercel, Claude Code

EXPERIENCE

Associate Full Stack Developer | Envision Next LLP Apr 2026 - Present

- Develop and maintain an enterprise CRM used by 200+ employees, covering incentives, HRMS, compliance, and automation modules.
- Owned end-to-end development of the Incentive module: Ruby on Rails APIs, PostgreSQL schema changes, calculation logic, employee and manager dashboards, approval workflows, filters, and exports.
- Built MahaRERA API integrations and Excel-driven automation for 1,000+ projects, implementing authentication, response processing, error handling, and project-information updates.

Development Intern | Tejas May 2025 - Oct 2025

- Built WebRTC signaling with Firebase Firestore for one-to-one video mentoring sessions, establishing peer-to-peer connections between students and tutors.
- Implemented real-time question and tutor-dashboard updates with Firestore onSnapshot listeners in React, and added UI transitions with Framer Motion.

OPEN-SOURCE CONTRIBUTIONS

Fleet (open-source device management) | 7 merged PRs | github.com/fleetdm/fleet

- Made `fleetctl apply` reject incorrectly typed profile paths and labels instead of silently dropping them and reporting success (Go) #55097.
- Stopped batch software uploads after the first package failure using a cancellable errgroup context (Go) #53407.
- Fixed return navigation from live reports and policies, script-package identification and search, script timeout messages, locked-host tooltips, and policy permissions for Observer+ (React, TypeScript) #54411 #53810 #54296 #54509 #54726.

Superserve (sandbox infrastructure for AI agents) | 2 merged PRs | github.com/superserve-ai/superserve

- Added MCP network-log pagination with cursor forwarding and regression tests (TypeScript) #356; fixed development-watcher output deletion #330.

PROJECTS

Drivly | Vehicle-Sharing Platform | drivly-mu.vercel.app

- Built a peer-to-peer vehicle-sharing web application with Next.js, TypeScript, Tailwind CSS, Prisma, and PostgreSQL, including JWT authentication and multi-user booking workflows.
- Prevented double bookings with conflict checks inside a database transaction using row-level locking, and calculated booking prices on the server from stored vehicle rates.

Blood Donor App | MERN Stack | donar-app-frontend.vercel.app

- Built donor-management and authentication REST APIs with Node.js, Express.js, and MongoDB, connected to a React frontend deployed on Vercel.

EDUCATION

B.E. in Information Technology | JSPM's RSCOE, Pune 2020 - 2024
CGPA: 8.3 / 10
