SUMMARY

Full Stack Developer building an enterprise CRM with **Ruby on Rails**, **React**, and **PostgreSQL**, with a strong foundation in **JavaScript**, **TypeScript**, **Node.js**, and **Next.js**. Builds **REST APIs**, third-party integrations, automation, and database-driven features end to end, with **9 merged pull requests** to open-source projects including Fleet.

SKILLS

Languages: JavaScript, TypeScript, Ruby, SQL, Go
Frontend: React.js, Next.js, Tailwind CSS
Backend: Ruby on Rails, Node.js, Express.js, REST APIs, JWT
Databases: PostgreSQL, MongoDB, Prisma ORM
AI & Tools: Claude Code, Git, Firebase, Vercel

WORK EXPERIENCE

Envision Next LLP — Associate Full Stack Developer **Apr 2026 - Present**

- Develop and maintain an enterprise CRM platform used by 200+ employees, working across HRMS, Incentives, Compliance Records, Automation, Scraping, Extensions, and Corrections modules.
- Owned end-to-end development of the Incentive module, building dashboards, employee and manager views, calculation logic, **Rails APIs**, database changes, filters, reports/exports, and approval workflows.
- Developed **MahaRERA API** integrations and automation for 1,000+ projects, implementing authentication, response processing, error handling, and Excel-driven workflows to automatically update project information.

Tejas — Development Intern **May 2025 - Oct 2025**

- Engineered a custom **WebRTC** signaling mechanism using **Firestore**, establishing peer-to-peer video connections in under 2 seconds for 1-on-1 remote mentoring sessions.
- Implemented zero-polling real-time data synchronization with **Firestore onSnapshot** listeners, processing student questions and updating tutor dashboards with sub-500ms latency.
- Integrated **Framer Motion** for fluid UI transitions and optimized frontend asset delivery for improved application performance.

OPEN SOURCE CONTRIBUTIONS

Fleet — Contributor (7 merged PRs) github.com/fleetdm/fleet

- Merged fixes across policy execution, software inventory, script handling, and navigation in a large-scale **Go** and **TypeScript/React** codebase (#54411, #53810, #54296, #54509, #54726).
- Made **fleetctl apply** reject incorrectly typed profile paths and labels instead of silently dropping them (#55097), and stopped batch software uploads after the first failure using a cancellable **errgroup** context (#53407).

Superserve AI — Contributor (2 merged PRs) github.com/superserve-ai/superserve

- Added **MCP** network-log pagination with cursor forwarding and regression tests (#356), and fixed a development watcher that deleted the HTTP build output (#330).

Vitest — Contributor github.com/vitest-dev/vitest

- Opened a pull request adding **Temporal.Instant** and **Temporal.ZonedDateTime** support to **vi.setSystemTime()** (#11321, in review).

PROJECTS

Drivly — P2P Vehicle-Sharing Platform Live Link

- Built a peer-to-peer vehicle-sharing platform for residential communities with **Next.js**, **TypeScript**, **Tailwind CSS**, **Prisma ORM**, and **PostgreSQL**, including custom **JWT** authentication and multi-user booking workflows.
- Prevented double bookings by running conflict checks inside a **database transaction** with **row-level locking**, and calculated booking prices on the server from stored vehicle rates.

Blood Donor App — MERN Stack Live Link

- Built **RESTful APIs** for authentication and donor management with **Node.js**, **Express.js**, and **MongoDB**, connected to a **React.js** frontend deployed on **Vercel**.

EDUCATION

B.E. in Information Technology, JSPM RSCOE - CGPA: 8.3 2020 - 2024
